

QuickTrax® series | Overview

- 1 Sturdy 2-component design: hard chain body, flexible film hinge
- 2 Plastic chain links
- 3 Extensive unsupported length
- 4 Inside space is gentle on the cables no interfering edges
- 5 Very quiet through integrated noise damping
- 6 Quick and easy to open
- 7 Inside/outside openable
- 8 Dividers and height separations for cable separation
- 9 Single-part end connectors with and without integratable strain relief

Inner heights

Inner widths

Features

- Extremely fast and easy cable laying thanks to crossbar with film hinge
- Each chain link consists of two different materials:
 - Hard chain body made of glass-fibre reinforced
 - Crossbar with flexible film hinge made of elastic special plastic
- Sturdy cable carrier design
- High torsional rigidity
- Very quiet through integrated noise damping
- Extensive unsupported length

Easy to open...

...even without tools

High side stability

Reliable cable separation

The two-component technology of the QT0320

The two-component technology of the QT0320 combines two seemingly incompatible features: Stability and flexibility.

Cable carriers need to be extremely sturdy, with extensive unsupported length. At the same time, cables need to be inserted easily for fast cable laying.

The QT0320 meets these requirements thanks to its innovative design and material combination of a hard cable carrier body made from glass fiber-reinforced material and crossbars with a film hinge made from rigid special plastic.

hard chain link of fiber glass reinforced material

Comparison of dimensions

Manufacturer	h i [mm]	h_G [mm]	t [mm]	Identical connec- tion hole pattern
QT0320	20.0	25.5	32.0	ja
Competitive product	17.5	23.0	30.5	ja

Comparison of bending moment

Comparison of bending strength

Advantages over competitive product

- 20 % longer unsupported length compared to competitive product
- 33 % greater additional load through use of fiber glass reinforced plastic
- Greater inner height

- Low noise operation due to internal damping system
- High side stability through locking in the stroke system
- Dividers can be used for cable separation

Pitch 32 mm

Inner height 20 mm

Inner widths 15 – 65 mm

Bending radii 28 - 125 mm

Stay variants

Design 030 page **134**

Frame with outside opening crossbars

- Weight-optimised plastic frame with particularly high
- torsional rigidity. Crossbar can be opened at any position on one side.
- Outside: openable.

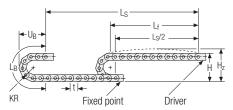

Design 040 page **135**

Frame with inside opening crossbars

- Weight-optimised plastic frame with particularly high torsional rigidity.
- Crossbar can be opened at any position on one side.
- Inside: openable.

Load diagram for unsupported length depending on the additional load.

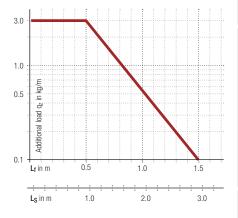

Intrinsic cable carrier weight $q_k=0.40\ kg/m$ with B_i 38 mm. For other inner widths, the maximum additional load changes.

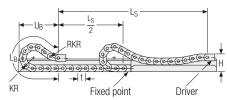

up to 2.9 m

Gliding arrangement

Speed up to 2.5 m/s

The gliding cable carrier must be guided in a channel. See p. 706.

Travel length up to 80 m

Only design 030 can be used for a gliding arrangement.

Divider systems

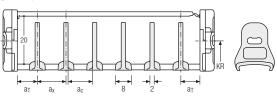

The divider system is mounted on each crossbar as a standard – on every 2nd chain link for stay mounting (HS).

As a standard, dividers or the complete divider system (dividers with height separations) are movable in the cross section (version A).

Divider system TS0 without height separation

Vers.	a _{T min} [mm]	a _{x min} [mm]	a _{c min} [mm]	n _{T min}
Α	4	8	6	_

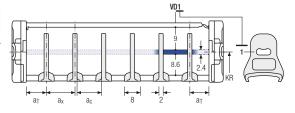

The dividers can be moved in the cross section.

Divider system TS1 with continuous height separation

Vers.	a _{T min} [mm]	a _{x min} [mm]	a _{c min} [mm]	n _{T min}
Α	4	8	6	2

The dividers can be moved in the cross section.

Order example

Please state the designation of the divider system (TS0, TS1,...), the version, and the number of dividers per cross section [n_T].

When using divider systems with height separation (TS1), please additionally state the position (e.g. VD1) viewed from the left driver belt. You are welcome to add a sketch to your order.

TRAXLINE® cables for cable carriers

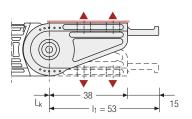

Hi-flex electric cables which were specially developed, optimised and tested for use in cable carriers can be found at traxline.de.

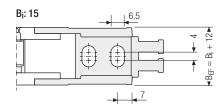

Inner

heights

Single-part end connectors – plastic (with integrated strain relief)

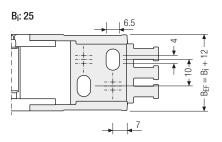

The plastic end connectors can be connected from above or below. The connection type can be changed by altering the position of the end connector.
