Features

- | | |
|---|---|
| <ul style="list-style-type: none"> » Excellent cable protection in the connector area » Chip and dirt resistant due to smooth surfaces » Extensive unsupported length » High torsional rigidity » Low noise emission » Easy-to-open cover with simultaneously high retention force on the chain link during operation | <ul style="list-style-type: none"> » Measurement scale for easy alignment of the dividers » TKA55: IP54 tested and certified* |
|---|---|

Optimized utilization of the interior space; vertical and horizontal inner distribution possible

Easy-open covers from any position offer secure fastening

Triple-stroke system for extensive unsupported length

Universal end connector with option for integrating strain relief elements

Divider systems

As a standard, the divider system is mounted on every 2nd chain link.

As a standard, dividers or the complete divider system (dividers with height separations) are movable in the cross section (**version A**).

The dividers are easily attached to the stay for applications with transverse accelerations and for applications laying on the side by simply turning them.

The locking cams click into place in the locking grids in the covers (**version B**).

Universal end connectors UMB – plastic (standard)

The universal end connectors (UMB) are made from plastic and can be mounted from the top, from the bottom, or face on.

▲ Assembly options

Recommended tightening torque: 5 Nm for cheese-head screws ISO 4762 - M5 x 8.8

B_i [mm]	B_{EF} [mm]	n_z
50	70	2 x 3
75	95	2 x 5
100	120	2 x 7
125	145	2 x 9
150	170	2 x 11

The end connectors are also available as an option **without** cover sheets. Please state when ordering.

Stay variants

Design 060 page 612

Covered on both sides with inside detachable cover

- » Plastic cover for rough environmental conditions with dirt, chips or spray water.
- » Fully detachable on one side in any position.
- » **Inside:** very quick release.

Design 080 page 613

Covered on both sides with outside detachable cover

- » Plastic cover for rough environmental conditions with dirt, chips or spray water.
- » Fully detachable on one side in any position.
- » **Outside:** very quick release.

Unsupported arrangement

KR [mm]	H [mm]	H _z [mm]	L _B [mm]	U _B [mm]
100	264	304	425	188
120	304	344	488	208
140	344	384	551	228
170	404	454	645	258
195	454	494	725	283
225	514	554	818	313
250	564	604	896	338
300	664	704	1211	388

Load diagram for unsupported length depending on the additional load.

Sagging of the cable carrier is technically permitted for extended travel lengths, depending on the specific application.

Intrinsic cable carrier weight $q_k = 1.95 \text{ kg/m}$ at $B_i 50 \text{ mm}$. For other inner widths, the maximum additional load changes.

Speed
up to 8 m/s

Acceleration
up to 40 m/s²

Travel length
up to 6.5 m

Additional load
up to 15 kg/m

Gliding arrangement

Speed
up to 3 m/s

Acceleration
up to 15 m/s²

Travel length
up to 150 m

Additional load
up to 15 kg/m

The gliding cable carrier has to be routed in a channel. See p. 866.

Stay variant 060 – covered on both sides with inside detachable cover

- » Plastic cover for rough environmental conditions with dirt, chips or spray water.
- » Fully detachable on one side in any position.
- » **Inside:** very quick release.

Stay arrangement on each chain link (**VS: fully-stayed**)

B_i 50 – 250 mm

The maximum cable diameter strongly depends on the bending radius and the desired cable type. Please contact us.

Calculating the cable carrier length

Cable carrier length L_k

$$L_k \approx \frac{L_S}{2} + L_B$$

Cable carrier length L_k rounded to pitch t

h _i [mm]	h _G [mm]	B _i [mm]					B _k [mm]	KR [mm]				q _k [kg/m]
45	65	50	75	100	125	150	B _i + 20	100	120	140	170	1,95
		175	200	225	250			195	225	250	300	4,28

Divider systems

As a standard, the divider system is mounted on every 2nd chain link.

As a standard, dividers or the complete divider system (dividers with height separations) are movable in the cross section (**version A**).

The dividers are easily attached to the stay for applications with transverse accelerations and for applications laying on the side by simply turning them.

The locking cams click into place in the locking grids in the covers (**version B**).

Divider system TSO without height separation

Vers.	a _T min [mm]	a _x min [mm]	a _c min [mm]	a _x grid [mm]	η _T min
A	5	10	7	-	-
B		10	7	2	-

Divider systemVersionη_THeight separation

Please state the designation of the divider system (**TS0, TS1...**), version and number of dividers per cross section [η_T].

If using divider systems with height separation (**TS1**) please also state the positions [e.g. VD1] viewed from the left driver belt. You are welcome to add a sketch to your order.

Divider system TS3 with height separation consisting of plastic partitions

As a standard, the divider **A** is used for vertical partitioning within the cable carrier. The complete divider system can be moved within the cross section. (**version A**).

The dividers are easily attached to the stay for applications with transverse accelerations and for applications laying on the side by simply turning them. The locking cams click into place in the locking grids in the covers (**version B**).

Divider version A

End divider

Vers.	a _T min [mm]	a _x min [mm]	a _c min [mm]	n _T min
A	4 / 2*	14	10	2

* For End divider

The dividers are fixed by the partitions. the complete divider system is movable in the cross section.

a _x (center distance of dividers) [mm]															
a _c (nominal width of inner chamber) [mm]															
14	16	19	23	24	28	29	32	33	34	38	39	43	44	48	54
10	12	15	19	20	24	25	28	29	30	34	35	39	40	44	50
58	59	64	68	69	74	78	79	80	84	88	89	94	96	99	112
54	55	60	64	65	70	74	75	76	80	84	85	90	92	95	108

When using partitions with **a_x > 49 mm** we recommended an additional preferential central support.
